EDUCATION

University of Texas at Dallas, Naveen Jindal School of Management Expected December 2026

B.S. in Finance – FinTech Concentration | Coursework: Business Analytics, Database Management, Financial Modeling, Financial Accounting, Corporate Finance, Investments, Derivatives

PROFESSIONAL SUMMARY

Finance and analytics student with hands-on experience in quantitative modeling, data analysis, and BI reporting. Proven ability to translate raw data into actionable insights using Python, SQL, and Excel. Seeking a finance, data analyst, or financial analyst role where I can support data-driven decision making.

WORK EXPERIENCE

Cash Capital Investment Aug 2024 – Jul 2025

AI-Driven Video Editor & Content Strategist

- Analyzed content performance data across 4+ platforms using AI-driven tools, surfacing high-performing patterns that improved audience engagement by 28%.
- Tracked and reported on 10+ campaign KPIs weekly, translating raw metrics into concise performance summaries for leadership decision-making.
- Streamlined content production workflow across a 60+ asset library, reducing average turnaround time by 35% through process improvements and automation.

Homes & Homes | Lagos, Nigeria Jun 2020 – Aug 2020

Real Estate / Accounting Intern

- Recorded and reconciled transaction data in Excel across a portfolio of 25+ active property listings, maintaining 100% documentation accuracy.
- Produced weekly financial reports and client-facing summaries, supporting senior staff with data entry and record-keeping across 3 ongoing deals.

PROJECTS

Algorithmic Trading & Portfolio Analytics Dashboard | Python | Pandas | NumPy | Streamlit | yfinance | Matplotlib

- Built a live portfolio dashboard that pulls market data via API, applies EMA and momentum signals, and surfaces risk metrics including VaR and Sharpe ratio.
- Implemented Monte Carlo simulation and GARCH volatility modeling to forecast portfolio risk, enabling data-backed position sizing.

Financial Database & Query Automation (SQL) | Python | SQLite | Oracle SQL | Pandas

- Designed and populated a relational financial database; wrote complex queries to extract performance summaries and flag data anomalies for review.
- Automated recurring data pulls and report generation, cutting manual processing time significantly.

VOLUNTEER EXPERIENCE

Garland Animal Shelter 2025 – Present

Volunteer Dog Walker | 64+ Hours

- Log 64+ hours of hands-on animal care, walking and socializing 5-10 dogs per session to support behavioral development and adoption readiness.
- Coordinate weekly with shelter staff to prioritize high-need animals, maintaining reliable attendance across rotating volunteer schedules.

TECHNICAL SKILLS

Programming & Analytics: Python (Pandas, NumPy, Matplotlib, Scipy, Streamlit, yfinance), SQL (Oracle, SQLite), R, VBA, Git
BI & Visualization: Tableau, Power BI, Streamlit, Advanced Excel (VLOOKUP, PivotTables, Power Query)
Quantitative Methods: Monte Carlo Simulation, GARCH Modeling, Black-Scholes, Value at Risk (VaR), Statistical Analysis
Finance: Financial Modeling, Risk Analytics, Options Pricing, Derivatives, Variance Analysis, P&L Reporting
Core Competencies: Data-Driven Decision Making, Cross-functional Collaboration, Attention to Detail, Process Improvement
